HR SYSTEM

Scenario, Page & Data Summary

Document type	Condensed business reference
Scope	5 scenarios · 26 pages
Source	Existing system screenshots
Environment	sems.futuresnet.net (Dev)
Version	1.0
Date	12 August 2026

How to read this document

This is the condensed companion to the full Business System Documentation. Each scenario is given as a short bullet list, followed by every page it contains and the data that appears on each page.

- Scenario — objective, key rules, and the business flow as numbered steps.
- Page — page code, page name and a one-line purpose.
- Data — the fields on a form page, or the columns on a list / grid page.

Conventions

- Field and page names are reproduced exactly as they appear in the system, including its typos (Governorate, Administration, Insured?, Omra Vacation, Statistical), so the document can be matched to the screen.
- Required = Yes only where the system displays an asterisk. Where it cannot be determined it is marked TBD.
- TBD = not visible in the source system and deliberately not invented.
- Auto = derived by the system and not editable by the user.

Scenario	Name	Pages
STF-EMP-01	Employee Personal Details NEW	12
STF-EMP-02	Employee Documents	1
STF-EMP-03	Approve Employee Status	1
STF-RPT	Reports	4 built + 11 listed
STF-VAC-01	Employee Vacation	3
Shared	SEMS Portal / navigation shell	1
— section 7 —	PROPOSED new scenarios (payroll, financials, attendance, talent)	17 / 40 screens

Contents

Right-click and choose “Update Field” to build the table of contents.

0. Navigation Shell

PG-STF-00 — SEMS Portal

Purpose: *Global shell: navigation, announcements and work-place context.*

Field / Data	Type	Required	Notes
Top navigation	Menu	—	Setup · Students · Staff · Services · Themes
Staff sub-menu	Menu	—	Profile · Attendance · Payroll · New Application · Insurance · LMS
Main Module panel	Menu	—	Content changes per area (Profile = 4 entries; Vacation = 1)
Current Date / Time	Date & Time	Auto	Live clock in the header
Notification banner	Text	Auto	Broadcast message; supports Arabic and an embedded link
Work Place	Dropdown	TBD	Main Campus · Maadi Academy · HeadQuarter. Does NOT filter page results
Header links	Link	—	EduHub · Change Password · Logout

TBD Role names are not exposed anywhere in the system, so every permission statement in this document is marked TBD.

1. STF-EMP-01 — Employee Personal Details NEW

Item	Value
Module	STF — Staff
Path	Staff → Profile → Employee Personal Details NEW
Type	Master-data management (Create · Search · View · Edit)
Primary actor	HR user (role TBD)
Pages	12

1.1 Scenario in brief

- Objective — maintain one complete, auditable master record per employee, used by every downstream Staff process.
- Key rule — the employee is identified by Civil ID (shown as Emp Id); Emp Code is generated by the system.
- Key rule — employees are never deleted; the lifecycle is managed through Status only.
- Key rule — nine documents are required per employee; Document Status stays Incomplete until all nine are uploaded.

Create flow

1. Open the Employees List and press Add New Employee.
2. Enter Nationality and Civil ID, then Continue.
3. System derives BirthDate and locks Nationality, Civil ID and ID Type.
4. Complete personal, military, contact and emergency data, then Continue.
5. The record is created and the Employee Profile opens with eight tabs.
6. Complete Education, Experience, Interviews, Hire Details and Documents.
7. Status moves from Incomplete Data to Active, and an audit row is written.

View / edit flow

1. Choose one of eight Search By criteria and press Search.
2. Open the record with the Details icon.
3. Edit the required tab and press its own save control.
4. Navigate with List, Previous or Next.

1.2 Pages

PG-EMP-01 — Employees List

Purpose: Search, browse and create employee master records.

Column	Type	Notes
Ser	Number	Row serial
Details	Action	Opens the employee profile
Pic	Image	Photo, or NO PHOTO AVAILABLE
Emp Code	Number	System-generated code
Emp Id	Text	Civil ID
English Full Name	Text	Default sort, ascending
Arabic Full Name	Text	—
Birth Date	Date	Dropdown filter
Cell Phone	Text	From Cell Phone1
WorkPlace	Text	Dropdown filter
Status	Status	Active / Incomplete Data

Search By (one at a time): Code · By Stage/Department/Status/Category · ID · Work Place · Job Title · Mobile · Name · Hire Type

Actions: Add New Employee · Search · Free-text search · Column filters · Group by column · Sort · Paging (32 items, 30 per page) · Open Details

PG-EMP-02 — New Employee (Identity)

Purpose: Wizard step 1 — establish the identity key.

Field / Data	Type	Required	Notes
Nationality	Dropdown	Yes	Egyptian observed; determines ID Type
Civil ID	Text	Yes	14 digits; becomes Emp Id; BirthDate is derived from it

Actions: Continue

PG-EMP-03 — New Employee — Personal Information

Purpose: Wizard step 2 — full personal profile.

Field / Data	Type	Required	Notes
First / Middle / Last / Family Name	Text	TBD	English full name
الاسم الاول / الاب / الجد / العائلة	Text	TBD	Arabic full name
Gender	Radio	Yes	Male (default) / Female
Religion	Dropdown	Yes	Muslim (default)
BirthDate	Date	Auto	Derived from Civil ID · read-only
Nationality	Dropdown	Auto	Carried forward · read-only
ID Type	Text	Auto	Civil · read-only
Civil ID	Text	Auto	Carried forward · read-only
Birth place	Text	TBD	—
Marital Status	Dropdown	TBD	—
Mother Name	Text	TBD	—
Spouse Name	Text	TBD	—
Medical Insurance	Radio	Yes	No (default) / Yes
Picture	File	TBD	Drag-drop or Browse; allowed types TBD
Military Status	Dropdown	TBD	Section: Military Status
Military Number	Text	TBD	—
Date	Date	TBD	Meaning of this date is TBD
Governorate	Dropdown	TBD	Section: Contact Information
District	Text	TBD	—
Street name	Text	TBD	—
Floor / Apt	Text	TBD	—
Home Phone1 / Home Phone2	Text	TBD	—
Cell Phone1 / Cell Phone2	Text	TBD	Cell Phone1 feeds the list grid
Personal Email / School Email	Text	TBD	—
Name	Text	TBD	Section: Emergency Contact
Home Phone	Text	TBD	—
Relationship	Text	TBD	Free text, not a lookup
Mobile Phone	Text	TBD	—

Actions: Browse (picture) · Continue

TBD No asterisks appear anywhere on this form, so mandatory fields cannot be determined.

PG-EMP-04 — Employee Profile (shell)

Purpose: Summary card plus the eight maintenance tabs.

Field / Data	Type	Required	Notes
Employee Name	Text	Auto	English full name
Status	Status	Auto	Active (green)
Employee ID	Text	Auto	Civil ID
Employee Code	Number	Auto	—
Last Processed By	Text	Auto	Last maintaining user
Category	Text	Auto	From Hire Details
Work Place	Text	Auto	From Hire Details
Job Title	Text	Auto	From Hire Details
Department	Text	Auto	From Hire Details
Supervisor Name	Text	Auto	----- when unassigned
Hire Date	Date	Auto	From Hire Details
Uploaded Docs	Counter	Auto	e.g. 0 of 9
Document Status	Status	Auto	Incomplete until all nine are uploaded
Last Status	Date	Auto	Written by the document batch job
Picture	Image + File	—	Inline photo replacement

Tabs: Personal info · Education · Experience · Interviews · Hire Details · Document · Status · History

Actions: List · « Previous · Next » · Tab switching · Browse (photo) · Collapse card

CONFLICT The card shows Work Place = Main Campus while the Hire Details tab shows HeadQuarter for the same employee. Unresolved.

PG-EMP-05 — Tab — Personal info

Purpose: Maintain personal data plus the Children register.

Field / Data	Type	Required	Notes
All PG-EMP-03 fields	—	TBD	Same field set as the create wizard
Nationality	Dropdown	TBD	Editable here, disabled on create
Civil ID	Text	TBD	Appears editable here
Child Name	Text	TBD	Children grid
National ID	Text	TBD	Children grid
Birth Date	Date	TBD	Children grid
Gender	Text	TBD	Children grid
in Our Schools	Flag	TBD	Children grid
School	Text	TBD	Children grid
Student ID	Text	TBD	Links to the Students module

Actions: Save Personal Info (top and bottom) · New (child row)

PG-EMP-06 — Tab — Education

Purpose: Qualifications, languages, exams and certifications.

Field / Data	Type	Required	Notes
Edu Level	Dropdown	Yes	Education Information grid

Field / Data	Type	Required	Notes
University / Faculty / Grad Year / Grade	Dropdown	No	—
Major Studies / High School	Text	No	—
Language	Dropdown	Yes	Language Information grid
Speak L / Read L / Write L	Dropdown	Yes	—
Language	Dropdown	Yes	Language Exam grid
Level	Dropdown	Yes	—
Exam Date	Date	Yes	—
Certificate Name	Text	Yes	Certifications grid

Actions: Add Education · Add Language · Add Language Exam · Add certificate · Save · Cancel

PG-EMP-07 — Tab — Experience

Purpose: Prior employment history.

Field / Data	Type	Required	Notes
Work Place	Text	Yes	Free text — previous employer, not the lookup
Date From	Date	No	—
Date To	Date	No	—
Job Title	Text	Yes	Free text
Salary	Number	No	Numeric spinner; currency TBD
Leaving Reason	Text	No	—

Actions: New · Update · Cancel

PG-EMP-08 — Tab — Interviews

Purpose: Recruitment interview trail.

Field / Data	Type	Required	Notes
Interview Date	Date	Yes	—
Comments	Text	No	Single-line text box
Interviewer	Text	Yes	Free text — not a system user list
Result	Dropdown	Yes	Lookup values TBD

Actions: New · Update · Cancel

PG-EMP-09 — Tab — Hire Details

Purpose: Employment relationship and organisational placement.

Field / Data	Type	Required	Notes
Hire Date	Date	TBD	Feeds the summary card
Emp Category	Dropdown	TBD	Non Teaching observed
Work Place	Dropdown	TBD	HeadQuarter observed
Branch	Dropdown	Auto	Disabled; 2008000 observed
Department	Dropdown	TBD	Administrative
Job Title	Dropdown	TBD	Administrative
Hire Type	Dropdown	TBD	غير مؤمن عليه
Hire Type Category	Dropdown	TBD	غير معتمد
Supervisor Department	Dropdown	TBD	Filters the supervisor list
Supervisor Name	Dropdown	TBD	Filtered by Supervisor

Field / Data	Type	Required	Notes
			Department
Stage Name	Dropdown	TBD	None observed
Number of Periods	Number	TBD	0 observed
MOE classification	Radio	TBD	— تربوي / غير تربوي neither selected
Insured?	Radio	Auto	Disabled; derived from Hire Type / Insurance module

Actions: *Save Hire Info*

PG-EMP-10 — Tab — Document

Purpose: *Upload and track the required employee documents.*

Field / Data	Type	Required	Notes
Document Type	Dropdown	Yes	Nine required types; values TBD
File	File	Yes	Only .jpg .jpeg .png .pdf
Receiving Date	Date	TBD	—
Document Name	Text	Auto	Grid column
Received Date	Date	Auto	Grid column
Return Date	Date	Auto	Grid column — no matching input
Creation Date	Date	Auto	Grid column
Processed by	Text	Auto	Grid column
Due Date	Date	Auto	Grid column — no matching input

Actions: *+ Add New • Hide • Browse • Save Document • Download ...'s Docs • Column filters*

PG-EMP-11 — Tab — Status

Purpose: *Terminate or reactivate, plus the status audit trail.*

Field / Data	Type	Required	Notes
Terminate / Reactivate	Radio	Yes	Mutually exclusive; disabled for the observed user
Termination Reason	Dropdown	Yes*	*Assumed — values TBD
Last Working Date	Date	Yes*	*Assumed
Comment	Textarea	TBD	—
Employee Status	Text	Auto	History grid — narrative of the change
User Name	Text	Auto	History grid
Machine Ip	Text	Auto	History grid
Date / Time	Date & Time	Auto	History grid

Actions: *Terminate • Reactivate*

PG-EMP-12 — Tab — History

Purpose: *Audit history.*

TBD The tab exists in the tab strip but its contents were never supplied. Assumed to be a broader audit trail than the Status-tab history.

2. STF-EMP-02 — Employee Documents

Item	Value
Module	STF — Staff
Path	Staff → Profile → Employee Documents
URL	/Contents/HR/EmployeeDocument_new.aspx?PagelId=136
Type	Compliance monitoring + batch operation
Pages	1

2.1 Scenario in brief

- Objective — monitor document compliance across a whole population, not one employee at a time.
- Difference from the Document tab — that page uploads for one employee; this page reports on many and recalculates their status.
- Key rule — Docs. Status is calculated, never typed; it is refreshed by Update Documents Status.
- Key rule — Docs. Status (documents) and Status (employment) are separate and independently filterable.
- Key rule — each employee carries a document Due Date.

Flow

1. Open Employee Documents; the composite criterion is selected by default.
2. Set the criteria and optionally the output language (EN / AR).
3. Press Search; the grid loads.
4. Review Docs. Status, Docs Count and Due Date; refine with column filters or grouping.
5. Optionally press Update Documents Status; the Last Status Update stamp refreshes.

2.2 Pages

PG-DOC-01 — Employees Documents

Purpose: *Population-level compliance monitor and batch recalculation.*

Column	Type	Notes
Ser	Number	Row serial
Details	Action	Drill-through to the employee
Pic	Image	—
Emp Code	Number	—
Employee Name	Text	Single name column
ID	Text	Civil ID
Cell Phone	Text	—
Docs. Status	Status	Calculated compliance state
Docs Count	Number	Documents uploaded
Due Date	Date	Completion deadline
Status	Status	Employment status
Work Place	Text	—
#	—	Purpose unclear

Criteria (9): By Stage/Department/Status/Category (default) · ID · Code · Work Place · Job Title · Mobile/Phone · Name · Hire Type · Documents Status

The composite criterion renders Stage · Department · Status · Category, each with --ALL--. Language: EN / AR (AR default). A Last Status Update timestamp is displayed.

Actions: Search · Update Documents Status · Column filters · Group by column

TBD Whether Update Documents Status acts on the displayed population or on all employees is unresolved — the highest-priority open question in this scenario.

3. STF-EMP-03 — Approve Employee Status

Item	Value
Module	STF — Staff
Path	Staff → Profile → Approve Employee Status
Type	Approval workflow
Primary actor	Approver (role TBD)
Pages	1

3.1 Scenario in brief

- Objective — enforce segregation of duties: whoever initiates a status change does not confirm it.
- Key rule — search is either by organisational grouping OR by a single identifying value; the two are mutually exclusive.
- Key rule — approval is a batch action: one Approve button under a multi-row grid.
- Key rule — the approver sees summary data only; there is no drill-through to the employee record.
- Key rule — there is no Reject action anywhere on the page.

Flow

1. Open Approve Employee Status; Code is pre-selected.
2. Either set Work Place / Stage / * Department / Category, or pick one single-value criterion.
3. Press Search; pending status changes are listed.
4. Select the items to approve (selection mechanism unconfirmed).
5. Press Approve; the status becomes effective and an audit row is written.

3.2 Pages

PG-APR-01 — Approve Employee Status

Purpose: Approval queue for pending employee status changes.

Field / Data	Type	Required	Notes
Work Place	Dropdown	No	Path A — Maadi Academy observed
Stage	Dropdown	No	Path A — -- All -- default
* Department	Dropdown	TBD	Path A — carries an asterisk yet defaults to All
Category	Dropdown	No	Path A — All default
Code / Mobile / ID / Name / Job Title	Radio + input	No	Path B — one only
SN	Number	Auto	Results grid
Name	Text	Auto	Results grid
Code	Number	Auto	Results grid — Emp Code
Status Date	Date	Auto	Results grid
Status Name	Status	Auto	Results grid — the pending status

Actions: Search · Approve

TBD How individual rows are selected for approval could not be determined — no checkbox column is visible on the grid.

4. STF-RPT — Reports

Item	Value
Module	STF — Staff
Path	Staff → Profile → Reports
Type	Read-only analytical and operational reporting
Pages	Index + 13 reports (2 from screenshots, 11 proposed)

4.1 Scenario in brief

- Objective — report on the employee population at aggregate and detail level.
- Key rule — reports are strictly read-only; no report page edits employee data.
- Key rule — reports exist in original and “New” generations (Employee Evaluation / Employee Evaluation New).
- Key rule — the index is a plain list: no search, no filter, no paging.

Flow

1. Open Reports and pick a report by name.
2. Set the criteria on the report page.
3. Press Show; the criteria are echoed above the results.
4. Review, drill down where figures are hyperlinked, then Export.

4.2 Pages

PG-RPT-00 — Reports (index)

Purpose: Catalogue of the 13 available reports.

Column	Type	Notes
S.No	Number	1–13
Report Name	Link	Launches the report

#	Report Name	Source
1	Active And In-Active Employees	From screenshots
2	Employee Documents	From screenshots
3	Employee Evaluation	Proposed
4	Employee Evaluation By Employee New	Proposed
5	Employee Evaluation New	Proposed
6	Employee Personal Details	Proposed
7	Employee Returned Documents	Proposed
8	Employee Training	Proposed
9	Employees By Gender	Proposed
10	Human Resources Statistic	Proposed
11	Man Power Control	Proposed
12	Number of Employees in All Schools (Chart Report)	Proposed
13	Students Discounts	Proposed

PG-RPT-01 — Employee Statistacal Report

Purpose: Workforce movement per school: hires versus withdrawals.

Field / Data	Type	Required	Notes
Stage / Department / Job Title / Category / Hire Type	Dropdown	No	All default to --ALL--
Report Type	Radio	Yes	All (default) / New Hired Emp. / Withdrawn Emp.
Date From / Date To	Date	No	Blank renders as N/A
Payroll Month/Year	Dropdown	No	Percentage denominator period

Column	Type	Notes
S.N	Number	1-31
School	Text	31 schools; the only in-grid filter
New Hired Emp.	Number (link)	Drills to the employee list
Withdrawn Emp.	Number (link)	Not clickable when 0
Diff.	Number	New Hired – Withdrawn, signed
Payroll Employees in (period)	Number	Dynamic header from Payroll Month/Year
New Hired Perc. %	Percentage	Formula not documented
Withdrawn Perc. %	Percentage	Formula not documented

Actions: Show · Export · Clear Filter · School filter · Drill-down (31 items, 200 per page)

NOTE The index calls this report “Active And In-Active Employees” but the page banner reads “Employee Statistacal Report”. Unresolved.

PG-RPT-01-M — Employees list (modal)

Purpose: Employee detail behind a clicked count.

Column	Type	Notes
Branch	Text	Context header — the clicked school
Employees Type	Text	Context header — Active Employees observed
#	—	Purpose unclear
Ser	Number	—
Stage	Text	Upper Primary / Lower Primary
Pic	Image	—
Employee ID	Text	Civil ID
Employee Code	Number	—
Employee Name	Text	Sorted A→Z
Department	Text	—
Job title	Text	—
Hire Date	Date	DD-Mmm-YYYY
Nationality	Text	—

Actions: Column filters · Scroll · Close

CONFLICT Reached by clicking “New Hired Emp.” yet captioned “Active Employees”, and containing employees hired in 2011. Unresolved.

PG-RPT-02 — Employee Documents (report)

Purpose: Configurable document extract — the user picks the population and the output columns.

Field / Data	Type	Required	Notes
Stage / Department / Category / Hire Type / Job	Dropdown	No	Path A — All

Field / Data	Type	Required	Notes
Title			
Status	Dropdown	No	Path A — defaults to Active
From Hire Date / To Hire Date	Date	No	Path A
Document Status / Document Name	Dropdown	No	Path A
Code / ID / Work Place / Mobile	Radio + input	No	Path B
Age From / Age To	Number	No	Path C
Output fields (11)	Checkbox	—	Staff ID · Staff Code · Employee Name · Name in English · Mobile (ticked) · Home Phone · Nationality · Department · Supervisor Name · Hire Date · Job Title
Header Required	Radio	Yes	Yes (default) / No
School Required	Radio	Yes	No (default) / Yes

Actions: Select All · De-Select All · Invert-Selection · Execute (control not captured)

PG-RPT-03 ... PG-RPT-13 — proposed reports

No screenshots exist for reports 3–13. Layouts were built from the report name plus fields confirmed to exist in the documented entities. Columns needing an unsupplied entity are marked below.

Report	Proposed columns	Missing entity
Employee Evaluation	Emp Code · Employee Name · Department · Job Title · Evaluation Period · Evaluator · Score · Result	Evaluation
Employee Evaluation By Employee New	Evaluation Criterion · Weight · Score · Comment	Evaluation
Employee Evaluation New	As report 3 (second generation)	Evaluation
Employee Personal Details	18 confirmed Employee fields (identity, contact, hire, status)	None — all confirmed
Employee Returned Documents	Emp Code · Employee Name · Document Name · Received Date · Return Date · Processed by · Due Date	None — all confirmed
Employee Training	Employee columns + Training Name · Date From · Date To · Provider · Status	Training
Employees By Gender	Work Place · Male · Female · Total · Male % · Female %	None (formulas TBD)
Human Resources Statistic	Department · Non Teaching · Teaching · Total · Active · Incomplete Data	None — all confirmed
Man Power Control	Work Place · Department · Job Title · Approved · Filled · Vacant · Variance	Establishment
Number of Employees in All Schools	School · Employees (bar chart over 31 schools)	Headcount figure
Students Discounts	Emp Code · Employee Name · Child Name · National ID · in Our Schools · School · Student ID · Discount % · Academic Year	Student Discount

5. STF-VAC-01 — Employee Vacation

Item	Value
Sub-module	VAC — Employee Vacation
Path	TBD → Main Module → Employee Vacation
Type	Transactional record-keeping
Primary actor	HR user recording on the employee's behalf
Pages	3

5.1 Scenario in brief

- Objective — record leave against a rule-based annual entitlement, scoped by academic year.
- Key rule — vacation is scoped by Academic Year, not calendar or fiscal year.
- Key rule — No Of Days is an inclusive calendar-day count; weekends and holidays are not excluded.
- Key rule — there are seven vacation types, stored bilingually (Name En / Name Ar).
- Key rule — no approval step exists; a saved vacation takes effect immediately.
- Key rule — a saved vacation cannot be edited or deleted from this page.

Flow

1. Open Employee Vacation and search for the employee.
2. Open the record with the Details icon.
3. Confirm the Academic Year.
4. Press + Add New Vacation.
5. Select Vacation Type, Date From and Date To; No Of Days is computed.
6. Press SAVE; the row is stamped with Added By, Date and Time.

5.2 Pages

PG-VAC-01 — Employee Vacation — Employees List

Purpose: Select the employee whose vacation is to be managed.

Column	Type	Notes
Same 11 columns as PG-EMP-01	—	Identical component, without the Add New Employee button

PG-VAC-02 — Employee Vacation

Purpose: Entitlement position and the vacation ledger for an academic year.

Field / Data	Type	Required	Notes
Employee Name / Status / Employee ID / Employee Code	—	Auto	Summary card
Last Processed By	Text	Auto	Blank on this page
Category / Work Place / Job Title	Text	Auto	Summary card
Department / Supervisor Name / Hire Date	Text	Auto	Summary card
Vacation Balance (Rule)	Number	Auto	Entitlement — 14 observed; rule TBD
Emp. Vacation	Number	Auto	Days consumed

Field / Data	Type	Required	Notes
Balance Remaining	Number	Auto	Balance – consumed
Academic Year	Dropdown	Yes	2025-2026 observed
Vacation Type	Text	Auto	Grid — rendered “English; Arabic”
Date From / Date To	Date	Auto	Grid
No Of Days	Number	Auto	Grid — calculated
Added By	Text	Auto	Grid — recording user
Date / Time	Date & Time	Auto	Grid — both show the same value

Actions: List · Academic Year · + Add New Vacation · Hide · Column filters

CONFLICT A 17-day Unpaid Leave was saved against a 14-day balance and the balance did not move. By design, a stale display, or a defect — unresolved.

PG-VAC-03 — Add New Vacation

Purpose: Capture a single vacation record.

Field / Data	Type	Required	Notes
Main Vacation Balance	Text	TBD	Pre-filled 14; editable or read-only is unclear
Vacation Type	Dropdown	Yes*	Seven bilingual values (below)
Date From	Date	Yes*	—
Date To	Date	Yes*	—
No Of Days	Number	Auto	Inclusive calendar days

*Assumed mandatory — no asterisks are shown on this form.

Actions: SAVE · Hide

Vacation Type lookup — the only fully enumerated lookup in the system

#	Name En	Name Ar
1	Emergency Leave	أجازة عارضة
2	Summer Annual Leave	أجازة صيفيه اعتيادية
3	Unpaid Leave	أجازة بدون مرتب
4	Pilgrimage Leave	أجازة حج
5	Annual Leave	أجازة اعتيادية
6	Exceptional Leave	أجازة استثنائية
7	Omra Vaction	أجازة عمره

6. Quick reference

6.1 Page directory

Code	Page	Scenario
PG-STF-00	SEMS Portal	Shared
PG-EMP-01	Employees List	STF-EMP-01
PG-EMP-02	New Employee (Identity)	STF-EMP-01

6.2 Main data entities

Entity	Key data	Pages
Employee	Emp Code · Civil ID · names (EN/AR) · demographics · status	PG-EMP-01 → 12
Military Status	Status · Number · Date	PG-EMP-03, 05
Contact Information	Governorate · District · Street · phones · emails	PG-EMP-03, 05
Emergency Contact	Name · Relationship · phones	PG-EMP-03, 05
Child	Name · National ID · School · Student ID	PG-EMP-05
Education / Language / Exam / Certification	Qualification and language data	PG-EMP-06
Experience	Employer · dates · job title · salary	PG-EMP-07
Interview	Date · Interviewer · Result	PG-EMP-08
Hire Details	Hire Date · Category · Work Place · Department · Job Title · Hire Type	PG-EMP-09
Employee Document	Type · file · received / return / due dates	PG-EMP-10, PG-DOC-01
Status History	Narrative · User · IP · Date · Time	PG-EMP-11
Pending Status Approval	Name · Code · Status Date · Status Name	PG-APR-01
School / Branch	31 confirmed values	PG-RPT-01
Employee Vacation	Type · dates · No Of Days · audit stamp	PG-VAC-02, 03
Vacation Type	7 values, Name En / Name Ar	PG-VAC-03
Academic Year	2025-2026	PG-VAC-02

6.3 Points still requiring confirmation

- Role names and the permission matrix — not exposed anywhere in the system.
- Which fields are mandatory on Personal info, Hire Details, Document and Vacation — no asterisks are used there.
- Work Place of employee 30912 — Main Campus on the card, HeadQuarter on Hire Details.
- Scope of Update Documents Status — displayed population or all employees.
- How rows are selected for approval, and how a status change is rejected.
- The two percentage formulas on the statistical report.
- Which of the seven vacation types deduct from the balance, and why the balance did not move.
- How an incorrectly entered vacation is corrected — no edit or delete control exists.
- The parent navigation item for the Employee Vacation area.
- The pages behind the Evaluation, Training, Returned Documents and Students Discounts reports.

7. Proposed Scenarios — new HR modules

IMPORTANT Everything in section 7 is a PROPOSAL. None of these screens exists in the supplied system. They were designed at the business's request from standard HR practice, and reuse the confirmed organisational dimensions (Work Place · Department · Job Title · Emp Category · Stage) so the design stays consistent with sections 1–6. Sections 0–6 remain the record of the system as it is today.

Four new areas covering 17 scenarios and 40 screens. Working screens for all of them are in the HTML prototype delivered alongside this document.

Area	Scenarios	Screens
Staff → Payroll	Salary Structure · Payroll Run · Payslip · Salary Increase / Increments · Payroll Reports	12
Employee Financials	Loans & Advances · Deductions & Penalties · Overtime · End of Service Settlement	10
Staff → Attendance	Daily Attendance · Shifts & Work Schedule · Permissions · Attendance Summary	9
Talent & Insurance	New Application · Employee Evaluation · Training · Insurance	11

7.1 Payroll — STF-PAY

PG-PAY-01 — Salary Structure (STF-PAY-01)

Purpose: Define each employee's salary components — earnings and deductions — with effective dates.

- Objective — hold one salary structure per employee that payroll can calculate from.
- Rule — every component carries Taxable and Insurable flags, which drive the statutory bases.
- Rule — components are effective-dated, so history is preserved when a salary changes.
- Rule — an employee without an active structure is blocked from the payroll run.

Flow

1. Open Salary Structure and filter the population.
2. Open the employee's structure.
3. Add or edit components (Basic, allowances, deductions).
4. Set the effective date and save; the previous version is retained.

Data

Field / Data	Type	Required	Notes
Basic Salary	Currency	Yes	The base for percentage components
Component Name	Dropdown	Yes	Earning / deduction component master
Component Type	Radio	Yes	Earning / Deduction
Calculation Method	Dropdown	Yes	Fixed · % of Basic · % of Gross · Formula
Value	Number	Yes	Amount or percentage
Taxable / Insurable	Checkbox	No	Drives the tax and insurance bases
Effective From / To	Date	Yes / No	Blank "to" = open-ended
Gross · Total Deductions · Net	Currency	Auto	Calculated from the components

PG-PAY-02 — Payroll Run (STF-PAY-02)

Purpose: Calculate, review, approve and post the monthly payroll for a population.

- Objective — produce one auditable payroll run per period and population.
- Rule — the run has a status lifecycle: Draft → Calculated → Approved → Posted.
- Rule — a posted run cannot be edited; corrections need a rollback or an adjustment run.
- Rule — the run pulls approved overtime, loan instalments, penalties and attendance deductions.
- Rule — validation blocks the run when an employee has no salary structure or no bank details.

Flow

1. Create a run for a Payroll Month/Year and Work Place.
2. Press Calculate; the system builds one line per employee.
3. Review the run lines and clear any validation issues.
4. Approve, then Post; export the bank transfer file.

Data

Field / Data	Type	Required	Notes
Payroll Month/Year	Dropdown	Yes	Open period only
Work Place / Emp Category / Department	Dropdown	Yes / No	Population selection
Payment Date	Date	Yes	Drives the bank file
Include New Hires / Withdrawn	Checkbox	No	Pro-rated by hire or last working date
Include Overtime / Attendance Deductions	Checkbox	No	Pulls from those modules
Run line: Basic • Allowances • Overtime • Gross	Currency	Auto	Per employee
Run line: Insurance • Tax • Loans • Penalties	Currency	Auto	Per employee
Net	Currency	Auto	Gross – total deductions
Status	Status	Auto	Draft • Calculated • Approved • Posted

PG-PAY-03 — Payslip (STF-PAY-03)

Purpose: View, print and send an individual payslip for a payroll period.

- Objective — give each employee a clear statement of earnings and deductions.
- Rule — the payslip is generated from a posted (or approved) payroll run; it is never keyed.
- Rule — year-to-date totals accumulate across runs in the same academic or tax year.

Flow

1. Filter by Payroll Month/Year and employee.
2. Open the payslip.
3. Print, download as PDF, or email it to the employee.

Data

Field / Data	Type	Required	Notes
Earnings	Table	Auto	Component and amount, from the salary structure
Deductions	Table	Auto	Insurance • tax • loans • penalties • attendance
Total Earnings / Deductions / Net	Currency	Auto	—
Year to Date	Table	Auto	Gross • deductions • net • tax
Payment Date / Method / Bank Account	Text	Auto	From the run and the employee record

PG-PAY-04 — Salary Increase / Increments (STF-PAY-04)

Purpose: Raise salaries individually or in batch, with an effective date and an approval step.

- Objective — apply increases consistently and keep a full history of who was raised, when and why.
- Rule — increases are grouped into a batch with one effective date and one approval.
- Rule — the batch has a lifecycle: Draft → Pending Approval → Approved → Applied.
- Rule — applying a batch writes a new effective-dated Basic Salary into the salary structure.
- Rule — the increase never takes effect in a payroll run dated before the effective date.

Flow

1. Create a batch, choose the increase type and effective date.
2. Select the population, or add employees individually.
3. Choose the method (fixed amount, percentage of basic, or new basic) and the value.
4. Recalculate to preview current basic, increase and new basic per employee.
5. Submit for approval, approve, then Apply.

Data

Field / Data	Type	Required	Notes
Batch Title	Text	Yes	—
Increase Type	Dropdown	Yes	Annual · Promotion · Merit · Cost of Living · Individual
Effective Date	Date	Yes	First payroll period affected
Apply To (Work Place · Department · Job Title · Category)	Dropdown	No	Population selection
Minimum Service (months)	Number	No	Excludes recent hires
Increase Method	Dropdown	Yes	Fixed Amount · Percentage of Basic · New Basic
Value / Round To	Number	Yes / No	—
Current Basic · Increase · New Basic · Difference · %	Currency	Auto	Per batch line
Total Monthly Impact	Currency	Auto	Sum of the batch lines
Reason / Attachment	Textarea / File	No	Approval memo

PG-PAY-05 — Payroll Reports (STF-PAY-05)

Purpose: Reporting over payroll runs, components, increments and statutory deductions.

- Objective — one place for payroll register, statutory and cost reporting.

Flow

1. Pick a report, set the period and population, then run and export.

Data

Field / Data	Type	Required	Notes
Proposed reports	List	—	Payroll Register · Bank Transfer File · Salary Comparison · Income Tax · Social Insurance · Loans Outstanding · Increments History · Cost by Department · Cost by Work Place · End of Service Provision · Salary Structure Audit

7.2 Employee Financials — STF-FIN

PG-FIN-01 — Loans & Advances (STF-FIN-01)

Purpose: Record employee loans and salary advances, and recover them through payroll instalments.

- Objective — lend to employees and recover automatically without manual tracking.
- Rule — the instalment schedule is generated from amount ÷ number of instalments.
- Rule — each instalment is linked to the payroll run that deducted it.
- Rule — a loan requires approval before any deduction starts.
- Rule — outstanding loans are pulled into the End of Service settlement.

Flow

1. Create the loan for an employee and set amount, instalments and start month.
2. Approve the loan; the schedule is generated.
3. Each payroll run deducts the due instalment and marks it Deducted.
4. Reschedule or settle early if needed.

Data

Field / Data	Type	Required	Notes
Employee	Lookup	Yes	—
Loan Type	Dropdown	Yes	Personal · Salary Advance · Emergency · Housing
Amount	Currency	Yes	—
Number of Installments	Number	Yes	—
Installment Amount	Currency	Auto	Amount ÷ instalments
Start Month	Dropdown	Yes	First payroll period to deduct from
Guarantor	Lookup	No	Another employee
Paid / Outstanding	Currency	Auto	Maintained by the payroll runs
Schedule: Due Month · Amount · Deducted In Run · Status	Table	Auto	One row per instalment

PG-FIN-02 — Deductions & Penalties (STF-FIN-02)

Purpose: Record disciplinary penalties and ad-hoc deductions to be applied in payroll.

- Objective — make disciplinary deductions traceable and approved before they hit pay.
- Rule — the value can be expressed in days, a fixed amount, or a percentage of basic.
- Rule — a day-based penalty is converted to money using the employee's daily rate.
- Rule — a penalty is only deducted once, in the payroll month it is assigned to.

Flow

1. Record the penalty against the employee with an incident date and reason.
2. Approve it and assign the payroll month.
3. The payroll run picks it up as a deduction.

Data

Field / Data	Type	Required	Notes
Employee	Lookup	Yes	—
Penalty Type	Dropdown	Yes	Verbal · Written · Warning with deduction · Absence · Other
Incident Date	Date	Yes	—
Reason	Textarea	Yes	—
Value Type	Radio	Yes	Days · Fixed Amount · % of

Field / Data	Type	Required	Notes
			Basic
Value	Number	Yes	—
Deducted Amount	Currency	Auto	From value type and daily rate
Payroll Month/Year	Dropdown	Yes	Period in which it applies
Attachment	File	No	Investigation report

PG-FIN-03 — Overtime (STF-FIN-03)

Purpose: Capture and approve overtime hours, priced by rate and paid through payroll.

- Objective — pay overtime accurately and only when approved.
- Rule — hours are derived from the time range; the rate multiplier comes from the overtime type.
- Rule — only approved overtime is picked up by a payroll run.
- Rule — overtime can be raised manually or generated from the attendance record.

Flow

1. Record or import the overtime entry.
2. The system computes hours, rate and amount.
3. Approve, then the payroll run pays it in the assigned month.

Data

Field / Data	Type	Required	Notes
Employee / Date	Lookup / Date	Yes	—
Overtime Type	Dropdown	Yes	Normal · Weekend · Public Holiday
From Time / To Time	Time	Yes	—
Hours	Number	Auto	From the time range
Rate	Number	Auto	Multiplier from the overtime type
Amount	Currency	Auto	Hours × hourly rate × multiplier
Payroll Month	Dropdown	Yes	—
Reason	Textarea	Yes	—

PG-FIN-04 — End of Service Settlement (STF-FIN-04)

Purpose: Calculate and settle final dues when an employee is terminated or resigns.

- Objective — close the employment relationship with a single, auditable settlement.
- Rule — triggered by a termination on PG-EMP-11 (Status tab).
- Rule — entitlements = gratuity + unused vacation encashment + final month salary.
- Rule — deductions = outstanding loans + unreturned documents or assets + notice shortfall.
- Rule — the settlement requires approval before payment.

Flow

1. Terminate the employee on the Status tab.
2. Open the settlement and press Calculate.
3. Review entitlements and deductions.
4. Approve, then Pay and print the settlement.

Data

Field / Data	Type	Required	Notes
Employee / Hire Date / Last Working Date	Auto	Auto	From the employee record
Service Years	Number	Auto	Hire Date to Last Working

Field / Data	Type	Required	Notes
			Date
Termination Reason	Dropdown	Auto	From the Status tab
Gratuity	Currency	Auto	Service years × entitlement rule
Unused Vacation	Currency	Auto	Balance Remaining × daily rate
Outstanding Loans	Currency	Auto	From Loans & Advances
Other Deductions	Currency	No	Unreturned documents or assets
Net Settlement	Currency	Auto	Entitlements – deductions

7.3 Attendance — STF-ATT

PG-ATT-01 — Daily Attendance (STF-ATT-01)

Purpose: Record and review daily in/out times, lateness, absence and overtime per employee.

- Objective — one daily record per employee that payroll and reporting can rely on.
- Rule — records arrive from a device import or manual entry; the source is always stored.
- Rule — lateness and early leave are measured against the assigned shift and its grace periods.
- Rule — a manual override always requires a reason.
- Rule — vacation and permission days are excluded from absence.

Flow

1. Import from the device, or enter manually.
2. The system computes worked hours, lateness, early leave and overtime.
3. Review and approve the day or period.
4. Send to the attendance summary and on to payroll.

Data

Field / Data	Type	Required	Notes
Employee / Date	Lookup / Date	Yes	—
Shift	Dropdown	Auto	From the employee's work schedule
Time In / Time Out	Time	No	Blank = no punch
Worked Hours	Number	Auto	Net of the shift break
Late (min) / Early Leave (min)	Number	Auto	After grace periods
Overtime Hours	Number	Auto	Beyond the shift threshold
Attendance Status	Dropdown	Yes	Present · Absent · Late · Early Leave · On Vacation · On Permission · Holiday
Source	Text	Auto	Device / Manual
Reason	Textarea	Yes	Mandatory for a manual override

PG-ATT-02 — Shifts & Work Schedule (STF-ATT-02)

Purpose: Define shifts, grace periods and weekends, and assign them to employees.

- Objective — give attendance a rule set to measure against.
- Rule — every employee must have an assigned shift for attendance to be calculated.
- Rule — grace periods suppress lateness and early leave inside the window.
- Rule — shift assignments are date-ranged, so schedule changes keep their history.

Flow

1. Create the shift with times, break, grace periods and weekend days.
2. Assign employees, with an assignment date range.
3. Attendance is then evaluated against the shift.

Data

Field / Data	Type	Required	Notes
Shift Code / Shift Name	Text	Yes	Code unique
From Time / To Time	Time	Yes	—
Break (min)	Number	No	Deducted from working hours
Working Hours	Number	Auto	Range – break
Grace In / Grace Out (min)	Number	No	Tolerance windows
Weekend Days	Multi-select	Yes	—
Overtime counts after (min)	Number	No	—
Absence threshold (min)	Number	No	Late beyond this counts as absent
Assigned Employees	Table	Auto	With assignment date range

PG-ATT-03 — Permissions (STF-ATT-03)

Purpose: Record short absences during the working day — late arrival, early leave or personal permission.

- Objective — distinguish an authorised short absence from lateness or absence.
- Rule — a permission suppresses the matching attendance penalty for that day.
- Rule — permissions may consume a monthly permission balance, except official assignments.
- Rule — a permission requires approval before it affects attendance.

Flow

1. Record the permission with date and time range.
2. The system computes the duration.
3. Approve; the attendance record for that day is adjusted.

Data

Field / Data	Type	Required	Notes
Employee	Lookup	Yes	—
Permission Type	Dropdown	Yes	Late Arrival · Early Leave · Personal · Official Assignment
Date / From Time / To Time	Date / Time	Yes	—
Duration (h)	Number	Auto	From the time range
Deduct from permission balance	Checkbox	No	Never for official assignment
Reason / Attachment	Textarea / File	Yes / No	—
Approved By / Status	Text / Status	Auto	—

PG-ATT-04 — Attendance Summary (STF-ATT-04)

Purpose: Monthly per-employee attendance totals, and the hand-off to payroll.

- Objective — turn daily records into the monthly figures payroll needs.
- Rule — the summary is generated from approved daily attendance only.
- Rule — Deduction Days is the figure the payroll run consumes.
- Rule — regenerating the summary after payroll has been posted is blocked.

Flow

1. Generate the summary for a payroll month and population.
2. Review the totals per employee.
3. Approve and send to payroll.

Data

Field / Data	Type	Required	Notes
Month / Work Place / Department	Dropdown	Yes	Population selection
Working Days / Attended / Absent	Number	Auto	—
Late Times / Late Minutes	Number	Auto	—
Early Leave / Overtime Hours	Number	Auto	—
Vacation Days	Number	Auto	From STF-VAC-01
Permission Hours	Number	Auto	From PG-ATT-03
Deduction Days	Number	Auto	The figure sent to payroll

7.4 Talent & Insurance

PG-REC-01 — New Application (STF-REC-01)

Purpose: Capture job applications and move them through screening, interview, offer and hiring.

- Objective — manage candidates before they become employees.
- Rule — the applicant is keyed on Civil ID, exactly as PG-EMP-02 keys an employee.
- Rule — BirthDate is derived from the Civil ID, consistent with the existing system.
- Rule — status lifecycle: New → Screening → Interview → Offer → Hired / Rejected.
- Rule — Convert to Employee carries the applicant data into STF-EMP-01 without re-keying.

Flow

1. Register the application with the applicant's identity and target job.
2. Screen, then schedule and record interviews.
3. Make an offer, or reject.
4. On acceptance, Convert to Employee.

Data

Field / Data	Type	Required	Notes
Applicant Name (EN / AR)	Text	Yes	—
Civil ID	Text	Yes	BirthDate derived, as in PG-EMP-02
Gender / Mobile / Email	Radio / Text	Yes / Yes / No	—
Job Title Applied / Work Place / Stage	Dropdown	Yes / Yes / No	Stage for teaching roles
Education Level / Years of Experience	Dropdown / Number	No	—
Expected Salary	Currency	No	—
Source	Dropdown	No	Website · Referral · Job Fair · Agency · Walk-in
CV	File	Yes	.pdf .doc .docx
Interviews	Table	Auto	Date · Interviewer · Comments · Result — same shape as PG-EMP-08
Documents	Table	Auto	Same shape as PG-EMP-10

PG-EVL-01 — Employee Evaluation (STF-EVL-01)

Purpose: Score employees against weighted criteria for a period, and record the outcome.

- Objective — a repeatable, weighted appraisal that feeds increments and training.
- Rule — criteria and weights come from an evaluation template; weights total 100.
- Rule — the evaluator defaults to the supervisor recorded in Hire Details.

- Rule — the evaluation is not final until the employee has acknowledged it.
- Rule — the recommendation can feed a Salary Increase batch or a training enrolment.

Flow

1. Create the evaluation for an employee, period and template.
2. Score each criterion; weighted scores and the rating are calculated.
3. Record strengths, development areas and a recommendation.
4. Submit, and have the employee acknowledge.

Data

Field / Data	Type	Required	Notes
Employee / Evaluation Period	Lookup / Dropdown	Yes	Period is academic-year based
Evaluation Type	Dropdown	Yes	Probation · Periodic · Annual · Promotion
Evaluation Template	Dropdown	Yes	Determines criteria and weights
Evaluator	Lookup	Yes	Defaults to the supervisor
Criterion / Weight % / Score / Weighted	Table	Yes	One row per criterion
Total Score / Rating	Number / Text	Auto	Sum of weighted scores
Strengths / Areas for development	Textarea	No	—
Recommendation	Dropdown	No	Increment · Promotion · Training · Warning · No action
Employee comment / Acknowledgement	Textarea / Checkbox	No	Completed by the employee

PG-TRN-01 — Training (STF-TRN-01)

Purpose: Plan training courses, enrol employees, and record attendance and results.

- Objective — plan and evidence staff development, including compliance training.
- Rule — enrolment is capped by the number of seats.
- Rule — attendance percentage determines whether a result and certificate can be issued.
- Rule — cost per attendee rolls up to a total course cost for budget reporting.

Flow

1. Create the course with dates, provider, seats and cost.
2. Enrol employees, individually or by population.
3. Record attendance and results.
4. Issue certificates.

Data

Field / Data	Type	Required	Notes
Course Name / Category	Text / Dropdown	Yes	Pedagogical · Technical · Compliance · Leadership · Language
Provider / Trainer	Dropdown / Text	No	—
From Date / To Date / Hours	Date / Number	Yes / Yes / No	—
Location / Seats	Text / Number	No	—
Cost per Attendee	Currency	No	Rolls up to total course cost
Target Audience	Multi-select	No	Department · Job Title · Emp Category
Attendees: Attendance % · Result · Certificate · Cost	Table	Auto	One row per enrolled employee

PG-INS-01 — Insurance (STF-INS-01)

Purpose: Maintain social and medical insurance registration and contribution shares.

- Objective — hold the registration data behind the Insured? flag on Hire Details.
- Rule — an employee may hold both a social and a medical policy at the same time.
- Rule — the insured salary is the base for both employee and employer contributions.
- Rule — contributions are pushed into the payroll run as deductions and employer cost.
- Rule — registering an employee here should set Insured? on PG-EMP-09.

Flow

1. Register the employee with insurance type, number and office.
2. Set the insured salary and the two contribution percentages.
3. Renew, suspend or terminate as the situation changes.
4. Export the statutory forms and send contributions to payroll.

Data

Field / Data	Type	Required	Notes
Employee	Lookup	Yes	—
Insurance Type	Dropdown	Yes	Social · Medical
Insurance Number / Insurance Office	Text / Dropdown	Yes	—
Start Date / End Date	Date	Yes / No	Medical policies renew annually
Insured Salary	Currency	Yes	Base for the contribution calculation
Employee Share % / Employer Share %	Number	Yes	—
Employee Share / Employer Share	Currency	Auto	Insured salary × percentage
Dependants	Number	No	Medical only
Status	Status	Auto	Active · Suspended · Terminated · Not registered

7.5 How these connect to the existing system

New scenario	Depends on / feeds	Existing page
Salary Structure	Employee, Department, Job Title, Emp Category	PG-EMP-09
Payroll Run	Salary structure, overtime, loans, penalties, attendance summary	PG-PAY-01 · FIN · ATT
Salary Increase	Writes a new effective-dated Basic into the salary structure	PG-PAY-01
Loans & Advances	Deducted by payroll; outstanding balance feeds End of Service	PG-PAY-02 · PG-FIN-04
Overtime	Can be generated from daily attendance; paid by payroll	PG-ATT-01 · PG-PAY-02
End of Service	Triggered by termination; uses vacation balance and loans	PG-EMP-11 · PG-VAC-02
Daily Attendance	Measured against shifts; excludes vacation and permissions	PG-ATT-02 · PG-VAC-02
Attendance Summary	Sends Deduction Days to payroll	PG-PAY-02
New Application	Convert to Employee creates the master record	PG-EMP-02 / PG-EMP-03
Employee Evaluation	Evaluator from Hire Details; recommendation feeds increments	PG-EMP-09 · PG-PAY-04
Training	Population by Department, Job Title, Emp Category	PG-EMP-09
Insurance	Should drive the Insured? flag;	PG-EMP-09 · PG-PAY-02

New scenario	Depends on / feeds	Existing page
	contributions feed payroll	

7.6 Decisions needed before build

- End of service gratuity formula — days or months of basic per year of service, and any cap.
- Income tax brackets and the social insurance percentages and ceiling to apply.
- Overtime multipliers for normal, weekend and public holiday hours.
- Whether the daily rate for penalties uses basic salary or gross salary.
- Approval routing and role permissions for payroll runs, increases, loans and settlements.
- Whether unused vacation is encashed at termination, and at which rate.
- The monthly permission balance, and which permission types consume it.
- The evaluation template — criteria, weights and rating bands.
- Whether attendance is imported from a device, and which device or file format.
- Currency, rounding rules and the bank transfer file format.
